Based in Barcelona, Spain (EU resident) | Remote | Available now

AT A GLANCE

- Experience** 9 years in product design. Most recently the sole designer at an AI startup; earlier, design lead at Latin America's largest investment bank.
- AI practice** Designs and builds with AI every day: Claude Code and Claude Design from idea to coded prototype to pull request, with rules and checks that keep AI-generated UI on the design system. Specifies AI interactions state by state: streaming, inline editing, agent handoffs, human-in-the-loop review.
- Focus** AI agent interactions (configure, understand, review, step in), dashboards and complex operational workflows, onboarding, design systems.
- Craft** High-fidelity UI and interaction design: typography, spacing, hierarchy and colour, built on components. Figma and coded prototypes (HTML/CSS, React).
- How I work** Owns problem definition to implementation review. Works directly with founders and engineers.

SELECTED WORK

Where AI lives in an institutional investment platform. Moved AI from a separate chat page into the surfaces people work in, with every AI change reviewed before it is kept.

<https://www.nayaramarques.com/ai-surfaces>

A design system AI can build from. One canonical source and rule families so AI tools reuse components instead of guessing.

<https://www.nayaramarques.com/design-system>

Capacity matching for private truck fleets. A comparison test showed plain email beat a planned platform; the redesigned email lifted response rate 250%.

EXPERIENCE

Clade | Senior Product Designer

May 2023 – Sep 2026 | New York, US (Remote)

AI platform for private capital markets. SaaS for investment workflows.

Scope: sole designer; three products and a marketing site in one codebase; six people building against the design system.

- Made AI agents reviewable: changes are proposed inline, reviewed before they are kept, and recoverable after, across dashboards, reports, documents and meeting notes.
- Moved AI out of a separate chat page into the surfaces people already use, in two modes: analysis (ask about what you see) and edit (change it, with review).
- Specified the AI composer as 26 frames in six state families, each with a line engineering can pass or fail.
- Built the design system in code: 48 components and 9 templates, tokens as the single source of truth, and rules so AI tools reuse what exists; anything new goes to review.

- Shipped pull requests against the React codebase and reviewed implementation against the spec.

Loadsmart | Senior Product Designer

Nov 2021 – Jan 2023 | Chicago, IL (Remote)

Freight logistics platform.

Scope: sole designer on a new vertical; 2 PMs and teams across four countries.

- Ran the research and design sprint for a capacity-matching product for private truck fleets.
- A comparison test with six fleet managers showed the plain email beat the planned web platform. Shipped a redesigned email instead: response rate up 250%.

BTG Pactual | Product Design Lead / Senior Product Designer

Apr 2020 – Oct 2021 | São Paulo, Brazil

Largest investment bank in Latin America.

Scope: first designer on BTG+, the bank's digital product, as the team grew; later led 4 product designers.

- Led the advisors platform for four business verticals (configurable dashboard, modular side menu, client workspace): 12 interviews, a concept test with 90% acceptance, one MVP all four directors signed.
- Led UX research and design for BTG+'s rollout of Pix, Brazil's instant-payment system.
- Worked on modular card insurance within the BTG+ team; a usability test moved the flow out of card signup to protect conversion.

BRQ Digital Solutions | Senior Product Designer (Consultant)

Feb 2018 – Apr 2020 | São Paulo, Brazil

- Embedded at BTG Pactual, CCEE, Itaú Unibanco and Ativa Investimentos, designing financial and energy products.

LoopKey | Product Designer

Jan 2017 – Feb 2018 | São Paulo, Brazil

- First product designer at an access-control hardware startup: consumer mobile app, B2B management dashboard, brand and motion language.

Art Director & Graphic Designer

Sep 2011 – Dec 2016 | Santa Catarina, Brazil

- Brand, print and digital work for Intelbras, Invictus Tactical and Grupo Polar.

SKILLS

Product design, UX/UI, user research, user journeys, wireframes, interactive prototyping, dashboards, complex workflows, SaaS, AI agent interactions, human-in-the-loop review, onboarding, design systems, component libraries, visual design, typography, AI-assisted design and prototyping, Claude Code, Claude Design, Figma, HTML/CSS, React, Git.

EDUCATION & LANGUAGES

Universidade do Sul de Santa Catarina | Graduação, Design | 2010 – 2015

Portuguese (Native), English (Full Professional), Spanish (Professional Working)
